Economics & Competitiveness

Economic, Productive & Financial Performance Of Alberta Cow/Calf Operations

Comparing:
Alberta Total, Top Profitability & Low Production Cost Management Groupings

Production Year - 1998

Nov-03
Foreword

This AgriProfit$ Cost & Returns Report presents the productive, economic & financial performance of cow/calf producers across Alberta for the 1998 production year.

Field research was undertaken through Alberta Agriculture’s AgriProfit$ Business Analysis & Research program with the cooperation of producers across the Province.

The intent of this report is to benchmark three specific management groupings:
- an ”Alberta Total” average including all program participants across the six grass type regions.
- an average of the "low cost" herds across the Province. This "Low Cost" average includes the lower 1/3rd of producers in the pool as ranked by total costs / lb. of calf weaned*.
- an average of the "top profit" herds across Alberta. This "Top R2E" average includes the upper 1/3rd of producers in the pool as ranked by profitability.*

The primary value of this report is to enable producers to gauge their productive, economic and financial performance relative to their peers locally and provincially. Benchmark analysis, comparing to one’s own detailed cost and returns analysis, is the first critical step in identifying operational strengths and weaknesses in a cow/calf operation.

The map above illustrates the location of each grass type region within Alberta. This package only reports the results of aggregated provincial groupings. If you are interested in obtaining information on specific regions, please contact the Economics Unit at:

J.G. O'Donoghue Building
#302, 7000 - 113 Street
Edmonton, Alberta
T6H 5T6

Tel: (780) 422-3771
Fax: (780) 427-5220

* For this analysis, return to equity (R2E) per lb. weaned & total production cost (TPC) per lb. weaned were the primary criteria for identifying the top management herd groupings. It should be noted, however, that there are several other factors that may contribute to the success of a cow/calf operation.

**Note: The regional and top management groups provided sufficient observations to develop the farm financial benchmarks … only these are used to develop the farm level financial performance indicators. Enterprise productive & economic information is developed based upon the whole regional sample.

Definitions & Explanations to Accompany the Cow/Calf Enterprise Overview

**Production Stock Sales** - revenues associated with the sale of weaned calves & other non-breeding stock related sales.

**Value of Production (VOP)** - the value of what was produced by the cow/calf enterprise over the course of the production year. Includes cash & non-cash values of:
- Cull & breeding stock sales,
- Revenues from miscellaneous sources (eg. program payments, patronage refunds, etc.) as allocated to the cow/calf enterprise,
- Inventory adjustments relating changes in the number & value of stock included in the enterprise,
- An adjustment for livestock purchases (value is added only from the point of purchase forward)

**Winter Feed Costs** - the cost of all feeds used by the cow/calf enterprise, purchased or homegrown, based on the market value of these feeds (not the cost of raising the feeds).

**Pasture Costs** - the value of grazing used by the cow/calf enterprise (exclusive of any other retained ownership/backgrounding uses). Pasture is valued into the cow/calf enterprise at market value (not cost) & is treated as a "cash" cost.

**Labour Costs** - a sum of paid & contributed labour, as allocated to the cow/calf enterprise. Paid labour is valued at cost, while unpaid labour is valued at a standard or base cost.

**Depreciation & Capital Lease Payments** - sum of depreciation & mach/equip/t/ bdg. lease payments on assets allocated to the cow/calf enterprise.

**Other Fixed Costs** - total cash overheads, as allocated to the cow/calf enterprise (share/lease cattle payments, property taxes, insurance, licences & term loan interest).

**Total Cash Costs** - sum of enterprise cash costs, considering home grown feeds, bedding & pasture as cash costs.

**Total Production Costs** - sum of all variable & fixed production costs.

**Contribution Margin** - VOP less Variable Costs

**Gross Margin** - VOP less Total Cash Costs

**Return to Investment** - VOP less Total Production Costs plus Term (Capital) Interest Paid

**Return to Equity & Management** - VOP less Total Production Costs

**Investment** - sum of assets allocated to the enterprise. Includes: breeding stock, machinery, equipment, buildings/facilities & building site (only).

**Breeding Performance Rates** (adjusted for sales & purchases of bred cattle)

- **Conception Rate (%)** - # Bred / # Exposed
- **Calving Rate (%)** - # Livebirths / # Bred Females
- **Weaning Rate (%)** - # Weaned / # Livebirths
- **Calf Crop (%)** - # Weaned / # Exposed
- **Calved in 1st & 2nd Cycles (%)** - # Calved Cycle 1 & 2 / Total Calved
- **Lbs. Weaned/Cow Exposed** - Total Lbs. Weaned / # Females Exposed
- **Lbs. Weaned/Cow Wintered** - Total Lbs. Weaned / # Bred Females Wintered
- **Wean Wt. as % of Cow Wt. (adjusting bred heifer wts.)** - Avg. Lbs. Weaned / Avg. Mature Cow Wt.
- **Weight per Day of Age (lbs.)** - Avg. Lbs. Weaned / Wtd Avg Wean Age
- **Cows Wintered** - Open Inventory of Bred Cows & Heifers
- **Cows / Bull** - # Cows & Heifers Exposed / # Bulls Used
- **Labour Hours / Cow** - Total Labour Hrs. / Cows Wintered
- **AUM's / Cow Wintered** - Total Enterprise AUM's / Cows Wintered
- **Feeding Season Days** - Days Fed (in yard)
- **Tonnes Fed per Cow** -
  - as-fed: Tonnes Total Feed (As-Fed) / # Cows Wintered
  - dry matter: Tonnes Total Feed (Dry Matter) / # Cows Wintered

**GOLD Indicators**

- **Growth (wean wt.)** - Total Lbs. Weaned / # Calves Weaned
- **Open Cows (%)** - # Open Cows & Heifers / # Exposed
- **Length of Calving Period** - Days from 1st to last calf
- **Death Loss of Calves (%)** - # Calves Died / # Livebirths
